

Children living in poverty

Among the Romanian population of 23 million people are more than 4 million gypsies. The majority are living in great poverty and without any hope for a better future.

Helpless, hungry, often beaten by alcoholised parents and forced to beg, many children never received before human warmth, care and charity.

Many live in huts of clay and wood, just with some plastic bags as windows and incredible broken roofs. For those we distribute relief goods directly on spot to the needy ones by our own local staff. Every family confirm by own signature on receipt, so we have most possible transparency for our donors and government.

Children find refuge, love & hope

In 1993 we opened our first children day-care centre in Transylvania. Today we run 12 day-care centres all over Romania. More than 1.100 children receive daily help and care through our own considerate co-workers. Financed by European

donors, individuals and churches, who decided to help those needy children and donate monthly a little amount to help them to escape the poverty. Those children who are coming into our day-care-centres are receiving daily food, regularly fit out with donated clothes and an education to hygiene manners. Infants come like into a kindergarten. School-age children come for

homework-care-program and get additional private lessons by our staff to receive better and best marks at government schools. Also they come for joint singing, playing, handicraft and for useful leisure-time activities.

During their time in our day-care-centres, they come to know the gospel of the living God Jesus Christ. Most of them make a personal decision

and start a close relationship with God. In their childlike faith, they discover that God answers their prayers. Some of them lead their own parents to Christ. Evening time we conduct bible-studies and prayer meetings with the parents. On Sunday we have in each day-care-centre regular Sunday service.
